SCALESOFT.NET

FEATURES

ScaleSoft.NET Truck Management System Software has been designed to be fast, flexible and easy to use. ScaleSoft.NET allows for simple fill in the blank setup and configuration within a familiar Windows based application environment. Reports of all transaction types can be created, customized, and printed from the program using the embedded report designer. Accounting information can be transferred directly into QuickBooks and other major accounting packages through a built-in export utility. ScaleSoft.NET can also interface with popular peripherals such as: signature tablets, RFID, intercom, video cameras, and more!

- Import data from your existing system
- Intuitive "fill in the blank" setup and data entry
- Configurable ticket format and printer information
- Connect to any Windows based peripheral
- Customizable reporting for deep insight into daily operations

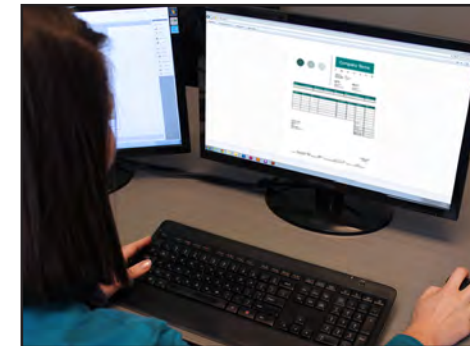

Data Entry

ScaleSoft.NET's intuitive and familiar Microsoft style interface gives operators the ability to easily enter all setup information about drivers, trucks, haulers, and customers.

Invoice Generation

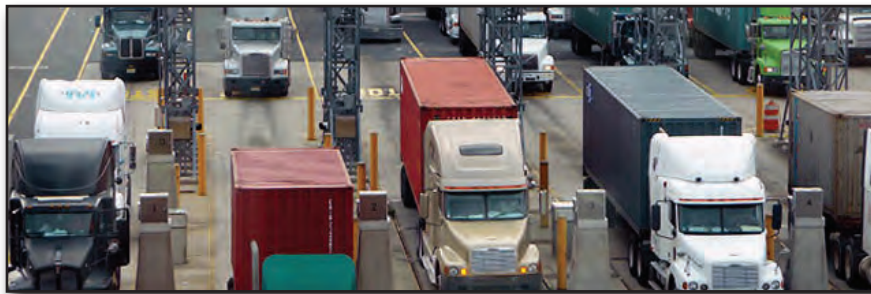

Generate invoices via a contracted price by material, customer, or just a single transaction. ScaleSoft.NET's data can be imported directly into accounting systems such as QuickBooks.

Unattended

Looking to save some costs or administer remote locations from a central point? By utilizing the B-TEK DD 2050 unattended terminal, you can capture all data at the scale versus a scale house. The DD 2050 communicates directly with ScaleSoft.NET creating tickets as drivers use the scale.

- Identify trucks via RFID, WiFi or Bluetooth
- Capture input from remote locations
- Configurable prompts & data collection
- Add peripherals such as: cameras, intercom, photo eyes, license plate scanners, and more

Truck In/Out

ScaleSoft is the ideal solution for attended and unattended truck in/out applications. The software has been designed to be flexible enough to fit almost any operation. 360 view reporting gives you full insight into your data.

Rail

ScaleSoft is also used by many rail in/out applications where tracking of cars and product is essential. Manual entry or RFID tagged cars can be tracked throughout your operation. As trucks, detailed rail car reports can be easily generated and customized per your requirements.

Included Reports

- Customer Activity
- Hauling Detail
- Daily Activity
- Cash & split cash tickets

Data Analyzer

- Create Excel like pivot tables
- Drag and drop designer
- 360 view of your data

Signature Tablet Included

Customization

ScaleSoft.Net has built-in reserve fields that can be used to customize the software to fit your specific process. No two applications are ever the same. By taking advantage of the reserve fields, you can capture data specific to your operation even with our standard package. Additionally, if you need more reporting insight, ScaleSoft.NET includes a report writer that allows you to create your own reports.

ASP.NET

Do you need to access scale information from more than one computer on your network? The ASP.NET add-on will allow any computer on the network with a web browser to log in without interrupting the operation of the scale.

- No software to install
- Web browser interface to ScaleSoft.NET
- Multiple users with single ASP.NET license
- Access to specific information can be password restricted
